

Inside Visit Protocol

- Staff or Security will escort me to the resident's room.
- Hand sanitizing stations are available in all hallways and should be used before entering and after exiting residents' room.
- My face mask must always remain on, as well as continuously worn by the resident.
- I must inform the facility if I develop any signs or symptoms of illness within 14 days of my visit.
- I must remain in the resident's room during the entire visit unless I have made arrangements with staff to take resident outside or off campus.
- I will not have access to any other locations inside Manor East. Residents in the Manor are near the Bistro. I can access the Bistro for carry-out purposes.
- Failure to follow protocol may result in limited access to visit.
